Subject: Phase 1 Stockpiles

Thank you Craig. We will work to get Stockpiles 203, 204, 206, 207, 208, 209, 210, 211, 212, 213, 216, 217, 219, and 224 off ASAP. The remaining piles will be used as backfill in the Phase 1 excavation.

Also, I noticed that I forgot to update the subject line in the previous emails (the subject line was Phase 2A Stockpile data). As the text of the email states, these are stockpiles from Phase 1. Sorry for any confusion that may have caused. Let me know if you have any questions.

Patrick

Subject: Re: Phase 2A Stockpile Data

Patrick,
The following piles need to go off-site for disposal:
3, 4, 6, 7, 8, 9, 10, 11, 12, 13, 16, 17, 19, and 24.

Piles not listed can remain on-site as backfill.

All,
Attached is the lab data and my "hits" spreadsheet from the phase 1 stockpiles.....

Please advise on which stock piles need to be removed from the site, and which stockpiles can stay.

Thanks

Subject: RE: Phase 2A Stockpile Data

Eric,

Attached is the Phase 1 stockpile data. Please note the sample ID that includes "SP225" is a duplicate sample. The other 24 samples are from stockpiles labeled 201-224. Please let me know EPA's position on the future location of these soils (on or off site). If possible, a determination by/on Monday (the 14th) would be ideal as we have completed moving all other impacted stockpiles offsite and are planning on having the end dump back onsite on Tuesday to deal with the remaining impacted soils, assuming we have EPA's position.

Thanks and have a great weekend!
Patrick
